

# FM012 Firestop Putty

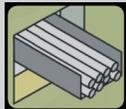

## Applications

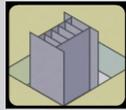

Air duct

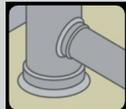

Insulated Pipe

Cable Tray

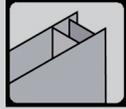

Busway

Plastic Pipe

Metallic Pipe

Partition Wall

## Description

FM012 Firestop Putty is an industry leading elastomeric paste, with fast reacting intumescent properties, designed to seal gaps around through-penetrations and block the passage of flame, toxic fumes and smoke. FM012 Firestop Putty's Listed designs offer exceptional performance and use less product, making it more cost effective than other traditional firestop putties.

FM012 Firestop Putty is used to protect penetrations such as cable bundles, conduits, metallic pipes, plastic pipes, busways and air ducts with up to a 3-hour fire resistance rating.

FM012 is highly intumescent, offers rapid expansion and high volume char, has excellent elasticity, is easy to install and will not sag in vertical applications. Completely halogen and asbestos free, it does not contain organic solvents.

Meets the intent of LEED® VOC environmental air quality requirements.

## Specifications

<b>Specific Density:</b>	<b>Approx. 11.50</b>
<b>Color:</b>	<b>Red</b>
<b>VOC:</b>	<b>11.50 g/L</b>
<b>Curing Time:</b>	<b>7-14 days</b>
<b>Application Temp:</b>	<b>40° F - 104° F (5° C - 40° C)</b>
<b>In-Service Temp:</b>	<b>-13° F - 176° F (-25° C - 80° C)</b>
<b>Storage Temp:</b>	<b>50° F - 95° F (10° - 35° C)</b>
<b>Shelf life:</b>	<b>24 months</b>
<b>Package:</b>	<b>310 ml/Tube; 25 Tubes/CTN 600 ml/Sausage, 20/CTN 5Kgs/Pail, 20Kgs/Pail</b>
<b>Performance:</b>	<b>50+ years HOAC tested</b>

Fill, void or cavity material.  
For use in through-penetration  
firestop systems.

# FM012 Firestop Putty

## Testing

**ASTM E 814, 2hrs. F and T Rating**

**UL 1479, 2hrs. F and T Rating**

L Rating at Ambient - Less than 1 cfm/sq. ft.

**FM Approved**

**ASTM E84 Flame 0 Smoke 25**

**CNS 14514, 3hrs. Class A**

**GB 23864**

**ASTM E662**

## Installation guide:

1. Refer to applicable certification directory or [www.painttoprotect.com](http://www.painttoprotect.com) for listed assemblies.
2. Ensure application area is clean and free of oil, loose dirt, rust or scale and is dry and frost free.
3. Install the correct depth and compression of forming material, if required, as detailed within the applicable Listed system. Allow for sufficient depth of fill material.
4. Using a caulking gun, trowel or putty knife, apply FM012 into the seams, gaps or voids between the penetrant and edge of annular space.
5. Tool the sealant surface smooth using a putty knife dipped in water, making complete contact with substrates to ensure an airtight/smoke tight seal.
6. Clean application tools with water.
7. FM012 firestop putty cures by water evaporation. It is not recommended for use in a wet environment.
